ABOUT US

Bennett Engineering LLC, a member of Bennett Group of companies, is specialized in providing temporary power solutions through its extensive fleet of power generators with facilities located in Dubai, Fujairah and Abu Dhabi. In addition to providing power solutions, Bennett Engineering also provides project management, engineering and technical assistance to a whole spectrum of industries. In power solutions, we are specialized in:

- **Sales and Rental of Diesel Generators**
- **Fuel Management System**
- **Refurbishment and Repairing of Marine Equipments**
- **Load Bank Rental and Sales**
- **Supply of Spares**
- **Design, Installation & Commissioning**
- **Refurbishment of Generators**

Bennett International Inc. was incorporated in Texas, U.S.A. in 1998 and was later renamed to Bennett Technical Services Inc. Bennett Technical Services provides crucial support in terms of logistics, sourcing of tools, equipment, agency, procurement, representation etc. from U.S.A. to the whole Bennett Group in the Middle East.

The Middle East Operations were started in 2002 and Bennett Engineering LLC was formed in 2002 in Dubai, U.A.E. Following is a list of companies under Bennett Group:

- a) Bennett Engineering LLC, Dubai, U.A.E.
- b) Bennett Middle East General Trading LLC, Dubai, U.A.E.
- c) Bennett Technical Services Inc., Humble, Texas, USA.
- d) Power House FZE, Fujairah, U.A.E.
- e) Bennett Technical Services Singapore Inc

Bennett Engineering provides:

- temporary power solution for the construction industry
- temperature control for temporary construction site offices
- emergency power due to power failure
- temporary power for outdoor activities
- additional power to address increased load factor

Whatever the reason may be, Bennett provides power when you need it, where you need it, 24/7, backed-up by timely, reliable, and efficient technical and maintenance services by qualified and experienced technical personnel. Our equipment and products are from reputed manufacturers in the UK, USA and other countries under the brand name of **POWER HOUSE**.

The requirement for temporary power in the U.A.E. has been on the rise in the recent years and currently stands at more than 20%. Bennett has been one of the leading supplier of temporary and alternate power solution provider in the U.A.E. We are now expanding to other African and Middle Eastern countries. Our aim is to provide uninterrupted power supply to all our customers. We are focused on serving our customers by providing exceptional value for money with high level of service and reliability.

We owe our success to our customers and partners who have patronized our services and products with confidence and trust. Our qualified, experienced and dedicated engineers, technicians and other service personnel are always ready to assist our customers in all their needs of temporary and alternate power requirements. We strive to fulfill and exceed our customer expectations with quality, reliability and on time power solutions.

BENNETT ENGINEERING POWER DISTRIBUTION SYSTEM

Why Bennett?

We design and build power distribution packages and components for temporary electric service for small/large construction sites, multi-building complexes, plant maintenance, utilities, sports centers, farms and anywhere else temporary power is required.

- Because each job site is unique and has specific requirements, we will design and build to meet the exact site requirements [Custom built].
- A continuous source of electrical power is critical to keep a facility operational. Our Generator Rental Fleet has the right sized generators that can meet your requirements for emergency, temporary or back up power packages.
- Our experienced staff can assist you with any questions you have regarding the type of power distribution package you need.
- Our quality generators, rental equipment is ready to roll from any of our branch locations to your site as per the requirement.

Benefits of using Bennett Engineering Power Packages:

- **Safe** – The entire package can be de-energized by a master breaker, and each separate circuit is protected by its own breaker. All generators, distribution boards and other equipments are grounded.
- **Labor Saving** – Temporary distribution assembly is eliminated so called electrical work.
- **Material Saving** – All breakers, receptacles and distribution are permanently housed enabling them to be reused.
- **Portable** – The equipment can be readily transported from location to location by crane or forklift. Removable legs make storage and transportation simple. One single panel is a power source for heavy equipment, hand tools and lighting.
- **Convenient** – One primary connection energizes the entire package, and a variety of outlet sizes and styles can be installed at the end users requirement.

MISSION

Our Mission is to provide efficient, timely, reliable and flexible temporary power solutions customized to our customer needs, whenever and wherever they need it.

VISION

Our Vision is to become the total power solution provider of choice for all our customers, whether it may be temporary or long term, regionally and globally.

SOLUTIONS

- **Sales and Rental of Diesel Generators**

- **BENNETT** supply Diesel Powered Generators from 5 KVA to 2000 KVA both for short term and long term rental and outright sale as well. We supply both CUMMINS and IVECO equipments.

POWER HOUSE

- **Fuel Management System**

- **POWER HOUSE** Fuel Management Program optimizes fuel performance with emphasis on cost-effective results on a variety of fuel intensive projects or operations. We provide innovative solutions for the distribution of fuel to enhance better management of onsite fuel consumption, estimate peak hour usage and enhance the security and control of fuel usage on all your projects. We integrate all transactional data so you can see a more accurate picture of fuel costs by taking reports of all the required data.

- **Power House – Fujairah Service Center (Specialized in All ranges of Cummins and caterpillar engines)**

-

Our Service Center is fully equipped with all tools, equipment and other resources required for serving the customer needs such as:

- Over head lifting facility
- Engine Rebuild stand
- All special tools
- Calibrated measuring instruments,
- Fault diagnostics tools
- Load banks
- Purpose built wash bay
- State of the art workshop facility
- Qualified Engineers and Technicians to carry out engines up to 16 cylinders.

In order to carry out fault diagnostics, repair, refurbishment and testing of all ranges of Diesel Engines and Generators by our qualified Technical Staff in a highly professional and customized manner. We can carry out fault diagnosis, repair, refurbish and test all kinds of generators from 5 kVA to 2000 kVA

We offer onsite/on board maintenance, trouble shooting, repair and testing of all ranges of diesel engines and generators for Marine and Offshore applications.

- **POWER HOUSE** provides annual maintenance contracts (AMCs) for all generators, whether on sale basis, long term or short term rental basis and supports clients with 24/7 breakdown attendance.

We can carry out fault diagnosis, repair, refurbish and test all kinds of generators from 5 kVA to 2000 kVS.

We offer onsite/on board maintenance, trouble shooting, repair and testing of all ranges of diesel engines and generators for Marine and Offshore applications.

- **Load Banks**

- Resistive, Resistive/inductive load banks can be customized for any application. They can be permanently connected to one power source for testing numerous sets in a workshop environment, or used for on-site commissioning, witness tests and proof trials. We have a complete line of load banks for load testing generators and power supplies.

- **Supply of Spares**

- We supply OEM parts from various manufacturers for all types and sizes of generators.

- **Design, Installation & Commissioning**

- **POWER HOUSE** provides turnkey solutions for the design and execution of temporary power generation and uninterrupted distribution systems in accordance with your project requirements.

FACILITIES
